PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 15+ years of experience ensuring software quality across FinTech, AI-driven SaaS platforms, and large-scale telecommunications systems, complemented by 20+ years of broader engineering experience in software development, connectivity/integration engineering, and cellular network engineering. Skilled in designing and scaling test automation frameworks and integrating automated testing into CI/CD pipelines within Agile delivery environments. Recent focus includes QA for Generative AI and AI Copilot solutions (Automation Anywhere), Financial Crime Compliance systems (SWIFT), and cognitive content / digital marketing platforms (Persado, Upstream). Proven ability to work under demanding deadlines, troubleshoot complex distributed systems, and collaborate across technical and business teams to deliver reliable results independently or as part of a team.

CORE SKILLS

Quality Assurance: Software Quality Assurance (QA), Manual & Automated Testing, Software Testing Life Cycle (STLC), SDLC

Test Automation Frameworks: Selenium/WebDriver, Pytest, TestNG, REST Assured, Serenity BDD, Cucumber, Robot Framework

Testing Types: UI Automation, API/REST Automation, Functional, Integration, Regression, Acceptance, Exploratory, Smoke, Data-Driven, User Acceptance Testing (UAT)

Programming & Query Languages: Python, Java, Bash, SQL, XML, JSON, HTML/CSS/JavaScript (UI/DOM literacy)

QA Strategy & Process: Test Strategy & Planning, Test Case Design & Estimation, Test Documentation & Reporting, Defect Lifecycle Management, Root Cause Analysis, Behavior-Driven Development (BDD), Agile/Scrum

API & Database Testing: REST API Testing, HTTP, SOAP, Request/Response Validation, SQL-Based Database & Backend Validation

CI/CD & Dev Tools: Jenkins, Git, Jira, Zephyr, Confluence, IntelliJ IDEA

Databases, OS & Platforms: Oracle SQL, Linux, Microsoft Windows, Mac OS

PROFESSIONAL EXPERIENCE

AUTOMATION ANYWHERE - Athens, Greece | Nov 2025 - Present

QA Engineer / Automation Specialist

- Building a Pytest-based test automation framework from scratch for the company's conversational AI platform, covering UI and API layers.
- Directly involved in AI bot testing, validating conversational flows, responses and behavior of the AI Copilot / generative AI solution.
- Design, build, and maintain scalable UI and API test automation frameworks using Selenium, Pytest, TestNG, and REST Assured.
- Integrate automated test suites into CI/CD pipelines (Jenkins), improving feedback cycles and release confidence for AI-driven products.
- Partner with Development and DevOps teams to define test strategy early in the SDLC and ensure seamless deployment pipelines.
- Perform root-cause analysis on defects and conduct manual/exploratory testing for complex, AI-driven scenarios.

MINDWAVE - Athens, Greece | Feb 2022 - Oct 2025

QA Automation Engineer | Consultant @ SWIFT - Financial Crime Compliance, Transaction Sanctions Screening

- Led the migration of 700 Robot Framework/Python tests to a new Selenium/Cucumber/Serenity (Java) framework, while maintaining the legacy Robot/Python suites in parallel until project completion to ensure uninterrupted quality coverage.
- Directly implemented new test cases in the Java framework alongside the migration, sustaining the highest level of platform quality throughout the transition.
- Prepared and executed QA procedures per industry standards and Agile methodology for SWIFT's FinTech suite.
- Estimated, planned and coordinated testing strategy; monitored results and validated exit criteria.
- Ensured quality issues and defects were identified, documented, tracked and resolved; contributed to automation framework development (UI and API).

UPSTREAM - Athens, Greece | Jul 2018 - Jan 2022

Senior IT Operations Integration Engineer

- Managed configuration, testing, deployment and support of messaging and billing gateway systems (HTTP/SOAP) for large-scale mobile marketing campaigns.
- Served as escalation point for production incidents, coordinating troubleshooting with internal and external technical teams to ensure high system availability.

25/8 PROJECTS - Athens, Greece | Dec 2017 - Jun 2018

QA Automation Engineer

- Estimated testing efforts and designed, implemented and executed functional, integration and regression test cases for betting platform features.
- Introduced automated regression testing using Selenium/WebDriver, TestNG and Git; logged defects via Jira (Zephyr) and Confluence.
- Collaborated with software, product and project management teams in an Agile environment; supported UAT.

PERSADO - Athens, Greece | Feb 2017 - Jul 2017

Software Quality Assurance Engineer

- Reviewed requirements and technical design documents; planned and coordinated project testing activities.
- Developed and executed manual and exploratory test cases; managed defects through Persado's defect life-cycle system.

PERSADO - Athens, Greece | Jul 2013 - Jul 2017

Connectivity Engineer

- Set up, configured, tested and supported client-facing production systems for large-scale digital marketing campaigns.
- Served as an escalation point for production issues, providing 2nd/3rd-level technical support and driving root-cause resolution.

VODAFONE - Athens, Greece | Jan 2005 - Jun 2013

Associate Senior Data Messaging Services Development Software Engineer

- Owned the full software lifecycle - requirements analysis, design, implementation, quality assurance, testing and production support - for in-house Java/Perl service applications integrating with multiple enterprise platforms.
- Built and tested internal web-based reporting tools used by Marketing and Customer Care teams, contributing to functional and regression test coverage.

VODAFONE - Athens, Greece | Sep 2000 - Dec 2004

Cellular Systems Radio Engineer

- Monitored radio network performance and led capacity/frequency planning; supported GSM 900/1800, GPRS and UMTS rollout.
- Designed new radio cells and base stations; contributed to cellular network design for Vodafone Albania.

HELLENIC AIR FORCE - Greece | Apr 1999 - Sep 2000

Meteorologist, Hellenic National Meteorological Service

- Produced pre-flight and en-route weather reports; decoded METAR/SYNOP data supporting aviation safety.

EARLY CAREER - Athens, Greece | 1995 - 1996

- Microcomputers Laboratory Demonstrator, University of Athens (Mathematics Dept.) - taught Pascal and MS-DOS/Windows to undergraduates.
- Statistics Trainee, Hellenic Statistical Authority - collected and analyzed trade-sector data with the University of Athens Mathematics Dept.

EDUCATION

UNIVERSITY OF ESSEX - Essex, England | 1997 - 1998

MSc, Telecommunication and Information Systems - Grade: 76.34% | Project: "Radio Wave Propagation with Applications on Cellular Mobile Radio Systems" (90%)

UNIVERSITY OF ESSEX - Essex, England | 1996 - 1997

Postgraduate Diploma, Communication Systems - Grade: 74.20% (Merit) | Project: "Traffic and Switching in an ATM Network: a Statistical Analysis" (80%)

UNIVERSITY OF ATHENS - Athens, Greece | 1991 - 1996

BSc, Mathematics - Grade: 7.22 / 10

CERTIFICATIONS & TRAINING

HONORS & AWARDS

- Nortel (Northern Telecom) Prize for best overall student performance, MSc Telecommunication and Information Systems, University of Essex, July 1998.
- Engineering and Physical Sciences Research Council (EPSRC) Studentship, 1997-98.
- Postgraduate Diploma in Communication Systems awarded with Merit, July 1997.
