Professional Summary

Senior QA Automation Engineer / SDET with 10 years in QA and test automation, within 25+ years of software and telecommunications engineering across FinTech and AI-driven SaaS. Builds automation frameworks with **Selenium**, **Pytest**, **REST Assured** and TestNG, integrated into **Jenkins** CI/CD pipelines in Agile teams. Led the migration of 700 Robot Framework tests to a Selenium/Cucumber/Serenity (Java) framework at SWIFT. At Automation Anywhere, tests Generative AI and AI Copilot solutions and automated regression, cutting execution from 2 days to under 1 hour.

Skills

Quality Assurance: Software Quality Assurance (QA), Test Management, Manual and Automated Testing, Software Testing Life Cycle (STLC), SDLC

Test Automation Frameworks: Selenium/WebDriver, Pytest, TestNG, REST Assured, Serenity BDD, Cucumber, Robot Framework

Testing Types: UI Automation, API/REST Automation, Functional, Integration, Regression, Acceptance, Exploratory, Smoke, Data-Driven, User Acceptance Testing (UAT)

Programming and Query Languages: Python, Java, Bash, SQL, XML, JSON, HTML/CSS/JavaScript (UI/DOM literacy)

QA Strategy and Process: Test Strategy and Planning, Shift-Left Testing, Test Case Design and Estimation, Test Documentation and Reporting, Defect Lifecycle Management, Root Cause Analysis, Behavior-Driven Development (BDD), Agile/Scrum

API and Database Testing: REST API Testing, HTTP, SOAP, Request/Response Validation, SQL-Based Database and Backend Validation

CI/CD and Dev Tools: Jenkins (CI/CD pipelines), Git, Docker, Jira, Zephyr, Confluence, IntelliJ IDEA, PyCharm

Databases, OS and Platforms: Oracle SQL, Linux, Microsoft Windows, Mac OS

Professional Experience

QA Engineer / Automation Specialist
Automation Anywhere, Athens, Greece
Nov 2025 - Present

- Automated the regression test suite, reducing execution from 2 days of manual testing to under 1 hour.
- Build a Pytest-based test automation framework from scratch for the company's conversational AI platform, covering UI and API layers.
- Test AI bots directly, validating conversational flows, responses and behavior of the AI Copilot / generative AI solution.
- Design, build and maintain scalable UI and API test automation frameworks using Selenium, Pytest, TestNG and REST Assured.
- Integrate automated test suites into CI/CD pipelines (Jenkins), improving feedback cycles and release confidence for AI-driven products.
- Partner with Development and DevOps teams to define test strategy early in the SDLC and ensure seamless deployment pipelines.
- Perform root-cause analysis on defects and conduct manual and exploratory testing for complex, AI-driven scenarios.

QA Automation Engineer, Consultant at SWIFT (Financial Crime Compliance, Transaction Sanctions Screening)
Mindwave, Athens, Greece
Feb 2022 - Oct 2025

- Led the migration of 700 Robot Framework/Python tests to a new Selenium/Cucumber/Serenity (Java) framework.
- Maintained the legacy Robot/Python suites in parallel until project completion to ensure uninterrupted quality coverage.
- Implemented new test cases in the Java framework alongside the migration, sustaining the highest level of platform quality throughout the transition.
- Prepared and executed QA procedures per industry standards and Agile methodology for SWIFT's FinTech suite.
- Estimated, planned and coordinated testing strategy; monitored results and validated exit criteria.
- Ensured quality issues and defects were identified, documented, tracked and resolved.
- Contributed to automation framework development (UI and API).

Senior IT Operations Integration Engineer
Upstream, Athens, Greece
Jul 2018 - Jan 2022

- Managed configuration, testing, deployment and support of messaging and billing gateway systems (HTTP/SOAP) for large-scale mobile marketing campaigns.
- Ensured uninterrupted bulk SMS submission by configuring and monitoring the messaging platforms, sustaining message rates of 1,200-1,500 SMS per second.
- Served as escalation point for production incidents, coordinating troubleshooting with internal and external technical teams to ensure high system availability.

QA Automation Engineer
25/8 Projects, Athens, Greece
Dec 2017 - Jun 2018

- Estimated testing efforts and designed, implemented and executed functional, integration and regression test cases for betting platform features.
- Introduced automated regression testing using Selenium/WebDriver, TestNG and Git.
- Logged defects via Jira (Zephyr) and Confluence.
- Collaborated with software, product and project management teams in an Agile environment.
- Supported User Acceptance Testing (UAT).

Software Quality Assurance Engineer
Persado, Athens, Greece
Feb 2017 - Jul 2017

- Reviewed requirements and technical design documents; planned and coordinated project testing activities.
- Developed and executed manual and exploratory test cases.
- Managed defects through Persado's defect life-cycle system.

Connectivity Engineer
Persado, Athens, Greece
Jul 2013 - Jul 2017

- Set up, configured, tested and supported client-facing production systems for large-scale digital marketing campaigns.
- Ensured uninterrupted bulk SMS submission by configuring and monitoring the platforms, sustaining message rates of 1,200-1,500 SMS per second.
- Served as an escalation point for production issues, providing 2nd/3rd-level technical support and driving root-cause resolution.

Associate Senior Data Messaging Services Development Software Engineer
Vodafone, Athens, Greece
Jan 2005 - Jun 2013

- Built Vodafone's first customer self-service applications over the SMS channel, including credit extension, bundle purchase, remaining balance and bundle checker, and infotainment services.
- Owned the full software lifecycle (requirements analysis, design, implementation, quality assurance, testing and production support) for in-house Java/Perl service applications integrating with multiple enterprise platforms.

- Built and tested internal web-based reporting tools used by Marketing and Customer Care teams, contributing to functional and regression test coverage.

Cellular Systems Radio Engineer
Vodafone, Athens, Greece
Sep 2000 - Dec 2004

- Monitored radio network performance and led capacity/frequency planning; supported GSM 900/1800, GPRS and UMTS rollout.
- Designed new radio cells and base stations; contributed to cellular network design for Vodafone Albania.

Early Career

Weather Observer (Military Service), Hellenic Air Force
Hellenic National Meteorological Service, Greece
Apr 1999 - Sep 2000

- Observed meteorological phenomena and parameters; encoded them into METAR and SYNOP reports.
- Provided weather information to airport authorities for pre-flight and route planning.

Microcomputers Laboratory Demonstrator
University of Athens (Mathematics Dept.), Athens, Greece
1995 - 1996

- Taught Pascal and MS-DOS/Windows to undergraduates.

Statistics Trainee
Hellenic Statistical Authority, Athens, Greece
1995 - 1996

- Collected and analyzed trade-sector data with the University of Athens Mathematics Dept.

Education

MSc, Telecommunication and Information Systems
University of Essex, Essex, England
1997 - 1998

- Grade: 76.34%
- Project: "Radio Wave Propagation with Applications on Cellular Mobile Radio Systems" (90%)

Postgraduate Diploma, Communication Systems
University of Essex, Essex, England
1996 - 1997

- Grade: 74.20% (Merit)
- Project: "Traffic and Switching in an ATM Network: a Statistical Analysis" (80%)

BSc, Mathematics
University of Athens, Athens, Greece
1991 - 1996

- Grade: 7.22 / 10

Certifications and Training

- Complete list of training courses: linkedin.com/in/aristotelismetsinis/details/courses/
- Complete list of licenses and certifications: linkedin.com/in/aristotelismetsinis/details/certifications/

Honors and Awards

- Nortel (Northern Telecom) Prize for best overall student performance, MSc Telecommunication and Information Systems, University of Essex, Jul 1998.
- Engineering and Physical Sciences Research Council (EPSRC) Studentship, 1997 - 1998.
- Postgraduate Diploma in Communication Systems awarded with Merit, Jul 1997.
